DPC Rm. 100

"The Ecology of Mind"

Nora Bateson

"The Ecology of Mind" is a film portrait of Gregory Bateson, celebrated anthropologist, philosopher, naturalist, systems theorist, and filmmaker. It's produced and directed by his daughter, Nora Bateson, who describes the film as "an invitations to ask the kinds of questions that could help thread the world back together from the inside." Selections will be screened.

"Space Times Square"

Barry Vacker

(Winner of the **John Culkin Award** for Outstanding Praxis in the Field of Media Ecology)

Drawing from Sartre, McLuhan, and others, this 24-minute film theorizes Times Square as a microcosm of our expanding media universe—an electronic cosmos of voids and nothingnesses, image and information, entertainment and inquisition, iPod people and hive-minds, flash mobs and flat-screens, cold war and terror war, black holes and vanishing points, cyberspace and outer space.

**Thursday, June 10
